Python Training

Diane Harrington

Kelly Williams

This session is BYOD. Please make sure you have access to your MSIA account and Office 365.

Let's explore Microsoft Imagine Academy's computer science pathway and dig into the Python course.

During the morning session we will look at this beginner course in which students can learn and practice coding in an online environment that requires only a modern web browser and Internet connection. No special software is required to complete this course. The course includes video content, practice labs, and coding projects.

Innovative Applications of the Business Model Canvas!
Professor John Gustincic
Northwood University

The Business Model Canvas is a visual tool often used as a guide by entrepreneurs when developing a new venture business model or plan.

Professor John Gustincic has worked with the Canvas extensively and has developed innovative approaches to the use of the Canvas

In addition to start-up business model development, the Canvas has proven to be of great value in the following areas:

- (1) business career exploration
- (2) innovation
- (3) critical thinking skills

The Business Model Canvas is a great project-based learning tool. Professor Gustincic has used the Canvas in a number of high school student engagements and it has proven to be both an engaging and effective educational tool.
